

(PDS) PRODUCT DISCLOSURE STATEMENT

VIP Automotive Solutions Pty Ltd reports do NOT guarantee the said vehicle / or part thereof for any damages, breakdowns, liability claims, latent issues, securities, complying with state laws and ADR's (Australian Design Rules), neither does it represent any legal report or roadworthy certificate. VIP Automotive Solution Pty Ltd reports are merely to advise you the buyer of the overall basic visual condition of the said vehicle in the window of time allotted, with an aim to giving you, to the best of our ability, a fair, unbiased and honest appraisal of the vehicle.

Where applicable, VIP inspection reports must be read in conjunction with the accompanying photographs, and we strongly recommend you contact your inspection officer directly to clarify any issues, prior to purchasing the vehicle. We also recommend you seek a qualified second opinion after you have received the report and photographs.

As all visual inspections are carried out in an 'allotted time window of opportunity', the vehicle status may change immediately after the VIP inspection officer has completed the service and left the premises, thus rendering the inspection report inaccurate and possibly void, as situations/circumstances may change the vehicle status dramatically.

Mechanical components are not dismantled to confirm diagnosis. Engine cam belts are not inspected, it is recommended the cam belt be serviced in accordance with the manufacturers recommendations.

The condition of brake linings, pads, drums and disc rotors are not determined during the visual inspection, however the overall brake performance is assessed during the road test. Instrumentation is not checked for accuracy. Engine additives and certain body detailing may cover up faults which may not be detectable during the inspection. Some noises and faults occur intermittently and are not always evident at the time of the inspection. Oil consumption cannot be measured during the inspection.

All vehicle road tests are subject to road and legal requirements and are conducted in the vicinity of the inspection site. VIP Automotive Solutions Pty Ltd cannot advise you of any defect that is not evident at the time of the inspection, nor predict the serviceability of any component.

VIP do not verify or authenticate vehicles as being genuine, whether they are, or are not. This onus rest wholly and solely on the buyer, to research and perform your due diligence.

In no way shall VIP Automotive Solutions Pty Ltd or any associated company or it's agents and inspection officers be held liable or responsible for any claim, regardless of the nature.

This report is **NOT** a recommendation that you purchase the fore-mentioned vehicle, this decision rests wholly and solely on **YOU** the buyer.
